Document	Description
YASKAWA AC Drive Option External Heatsink Installation Kit Instruction Manual	Read this manual before you install the kit. The manual contains information about how to install the kit to put the heatsink external to the enclosure panel.
YASKAWA AC Drive Manuals	Refer to the manual packaged with the drive for basic information about the drive. Refer to the Technical Manual for more information about programming and parameter settings.
Transaction (Control of Control o	You can download drive manuals from the Yaskawa product and technical information website shown on the back cover of this manual.

2 General Safety

◆ Supplemental Safety Information

▲ DANGER

This signal word identifies a hazard that will cause serious injury or death if you do not prevent it.

A WARNINGThis signal word identifies a hazard that can cause death or serious injuries if you do not prevent it.

▲ CAUTION

Identifies a hazardous situation, which, if not avoided, can cause minor or moderate injury.

NOTICE

This signal word identifies a property damage message that is not related to personal

injury.

Section Safety

General Precautions

- Some figures in the instructions include options and drives without covers or safety shields to more clearly show the inside of the drive. Replace covers and shields before operation. Use options and drives only as specified by the instructions
- · The figures in this manual are examples only. All figures do not apply to all products included in this manual.
- Yaskawa can change the products, specifications, and content of the instructions without notice to make the product and/or the instructions better.
- If you damage or lose these instructions, contact a Yaskawa representative or the nearest Yaskawa sales office on the rear cover of the manual, and tell them the document number on the front cover to order new copies.

A DANGER

Electrical Shock Hazard. Do not examine, connect, or disconnect wiring on an energized drive. Before servicing, disconnect all power to the equipment and wait for the time specified on the warning label at a minimum. The internal capacitor stays charged after the drive is de-energized. The charge indicator LED extinguishes when the DC bus voltage decreases below 50 Vdc. When all indicators are OFF, remove the covers before measuring for dangerous voltages to make sure that the drive is safe. If you do work on the drive when it is energized, it will cause serious injury or death from electrical shock.

▲ CAUTION

Burn Hazard. Do not touch a hot drive heatsink. De-energize the drive, wait for a minimum of 15 minutes, then make sure that the heatsink is cool before you replace the cooling fans. If you touch a hot drive heatsink, it can burn you.

A WARNINGElectrical Shock Hazard. Only let approved personnel install, wire, maintain, examine, replace parts, and repair the drive. If personnel are not approved, it can cause serious injury or death.

A WARNINGSudden Movement Hazard. Tighten the screws to the specified tightening torque. Incorrect tightening torques can cause damage to equipment and cause serious injury or death from falling equipment.

NOTICE

Damage to Equipment. When you touch the drive and circuit boards, make sure that you observe correct electrostatic discharge (ESD) procedures. If you do not follow procedures, it can cause ESD damage to the drive circuitry.

3 Overview

You can install the drive with the heatsink external to the enclosure panel. This installation method is "external heatsink installation". This kit uses attachments to do an external heatsink installation on drives that do not have mounting brackets on the heatsink. When you use this kit to install the drive with the heatsink external, the drive will release its heat external to the enclosure panel. This will let you install the drive in a smaller enclosure panel and prevent too much heat in the enclosure panel.

This manual also tells you how to use the mounting brackets supplied with the drive to do an external heatsink installation

◆ Compatible Products

This installation kit is compatible with these drives:

- GA700
- GA800
- CH700
- CR700

♦ Installation Environment

Environment	Conditions
Area of Use	Indoors
Power Supply	Overvoltage Category III
Ambient Temperature Setting	IP20/UL Open Type: -10°C to +50 °C (14 °F to 122 °F) IP20/UL Type 1: -10 °C to +40 °C (14 °F to 104 °F) • Drive reliability is better in environments where the temperature does not increase or decrease quickly. • When you install the drive in an enclosure, use a cooling fan or air conditioner to keep the internal air temperature in the permitted range. • Do not let the drive freeze. • You can use IP20/UL Open Type drives at a maximum of 60 °C (140 °F) when you derate the output current. • You can use IP20/UL Type 1 drives at a maximum of 50 °C (122 °F) when you derate the output current.
Humidity	95%RH or less Do not let condensation form on the drive.
Storage Temperature	-20°C to +70°C (-4°F to +158°F) (short-term temperature during transportation)
Surrounding Area	Pollution degree 2 or less Install the drive in an area without: Oil mist, corrosive or flammable gas, or dust Metal powder, oil, water, or other unwanted materials Radioactive or flammable materials. Harmful gas or fluids Salt Direct sunlight Keep wood and other flammable materials away from the drive.
Altitude	1000 m (3281 ft) Maximum Note: Derate the output current by 1% for each 100 m (328 ft) to install the drive in altitudes between 1000 m to 4000 m (3281 ft to 13123 ft). It is not necessary to derate the rated voltage in these conditions: Installing the drive at 2000 m (6562 ft) or lower Installing the drive between 2000 m to 4000 m (6562 ft to 13123 ft) and grounding the neutral point on the power supply. Contact Yaskawa or your nearest sales representative if you will not ground the neutral point.
Vibration	 10 Hz to 20 Hz: 1 G (9.8 m/s², 32.15 ft/s²) 20 Hz to 55 Hz: Different for different models. Refer to the manual packaged with the drive.
Installation Orientation	Install the drive vertically for sufficient airflow to cool the drive.

NOTICE

Do not let unwanted objects, for example metal shavings or wire clippings, fall into the drive during drive installation. Put a temporary cover over the drive during installation. Remove the temporary cover before start-up. Unwanted objects inside of the drive can cause damage to the drive.

4 Receiving

- Examine the products for damage.
 If there is damage to the products, contact the shipping company immediately. The Yaskawa warranty does not include damage from shipping.
- 2. Verify the product model number to make sure that you received the correct model. If you have problems with the products, contact the distributor where you purchased the products or the Yaskawa sales office immediately.

Kit Models and Installation Procedure

▲ CAUTION Crush Hazard. Tighten terminal cover screws and hold the case safely when you move the drive. If the drive or covers fall, it can cause moderate injury.

AWARNINGCrush Hazard. Before you hang the drive vertically, use screws to correctly attach the drive front cover and other drive components. If you do not secure the front cover, it can fall and cause minor injury.

A WARNINGCrush Hazard. When you use a crane or hoist to lift the drive during installation or removal, prevent more than 1.96 m/s² (0.2 G) vibration or impact. Too much vibration or impact can cause serious injury or death from falling equipment.

A WARNINGCrush Hazard. When you lift the drive during installation or removal, do not try to turn the drive over and do not ignore the hanging drive. If you move a hanging drive too much or if you ignore it, the drive can fall and cause serious injury or death.

The installation procedure is different for different drive models. Refer to Table 5.5.

Gasket and Sealant

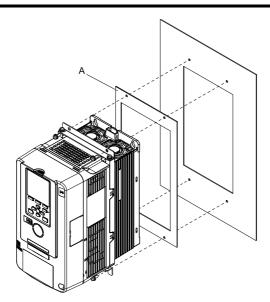

If the environment around the heatsink does not meet the recommendations for the drive installation environment, install a gasket or apply sealant as shown in Figure 5.19 and Figure 5.20. Make sure that the drive is safe from unsatisfactory environmental conditions.

Use a gasket that is approximately 2 mm (0.08 in) thick and made from CR or an EPDM-based rubber sponge.

Yaskawa recommends these products:

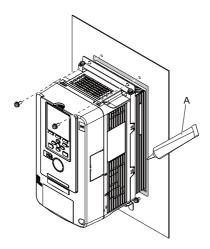

- Gasket: INOAC CORPORATION C-4205
- Sealant: Shin-Etsu Silicone KE-3494 from Shin-Etsu Chemical Co., Ltd.

Refer to *Panel Cut-Out Dimensions on page 12* for the gasket dimensions.
